Subject Index to Volume 12

Abstracts
from ASBMB 1998 Annual Meeting, 509
from Experimental Biology '98, 375
Acetylcholine: prenatal effects of choline on hippocampal cholinergic system and, 349
Aconitase: doxorubicinol inactivation of, 541
Acquired immunodeficiency syndrome See AIDS dementia; Human immunodeficiency virus infection
Acromegaly: growth hormone overexpression in, 1455
Actin: in thin filament regulation in vertebrate skeletal muscle, 761
Active avoidance behavior: LP-BM5 infection and, 175
Adenosine A_1/A_2 receptor: cardiac myocyte ischemia resistance and, 1785
Adenosine receptor blockade: glucose uptake and, 1301
Adenylate kinase: in regulation of ATP-sensitive K^+ channels, 523
Adenylyl cyclases V and VI: $G_{\beta\gamma}$ subunits inhibition of, 1019
Adipocytes
bone marrow, leptin expression by, 747
lipolysis inhibition in, by agouti gene, 1391
Adipose tissue: UCP homologues in, as thermogenesis mediators vs. fuel lipid regulators, 715
Adrenal cortex: 11β-hydroxysteroid dehydrogenase in, 1533
Aging
ascorbic acid changes in, reversal of with (R)-α-lipoic acid, 1183
lipid metabolism changes in, atherosclerosis and, 433
up-regulation of neuronal 5-lipoxygenase expression and, 439
agouti gene
lipolysis inhibition in adipocytes by, 1391
maternal epigenetics and methyl supplements and, 949
AIDS dementia: LP-BM5 infection as animal model of, 175
AIDS: See also Human immunodeficiency virus infection
Alcohol
brain damage from, edema-based mechanism of, 221
DNA alterations and, 753
Allergen(s)
birch pollen, antibody binding to, peptide mimotope inhibition of, 1635
IgE reactivity of, mutagenic modulation of, 231
Alzheimer's disease
amyloid beta and lipid metabolism in, 1087
oxidative stress in, 1777
peripheral markers in diagnosis of, 3
proteolytic imbalance in fibroblasts in, 925
American Society for Biochemistry and Molecular Biology 1998 Annual Meeting: abstracts from, 509
Amino acid homochirality: RNA-directed, 503
Amino acid transport system y^+L/4F2hc: as heteromultimeric complex, 1319
Aminoacylation: of RNA, stereoselectivity of, 503
Aminoacyl tRNA synthetases: as targets for new anti-infectives, 1599
Angiogenesis: inhibition of by kringle domains of angiostatin, 1731
Angiostatin: kringle domains of, antiangiogenesis activity of, 1731
Animal models: principles and philosophy for, 275
Anion channels: voltage dependent, in DNA translocation, 495
Antibiotics: aminoacyl tRNA synthetases as targets for, 1599
Antibodies: cardiac, in Chagas' disease, Trypanosoma cruzi blocking of, 1551
Antigens: Kell blood group and CD10, as K562 differentiation markers, 531
Antioxidant effects: of S-nitrosoglutathione, 165
Antisense telomerase: apoptosis or differentiation by, 801
AP-1: manganese-containing superoxide dismutase inhibition of, in breast cancer cells, 1713
Ap_3A: in stimulus-secretion coupling, 1499
Apolipoprotein A-I: production of by chicken granulosa cells, 897
Apoptosis
by antisense telomerase, 801
cell rescue from, by inhibition of reduced glutathione extrusion, 479
ceramide-mediated signaling in, 999
increased lymphocyte, in spaceflight, 1007
IRF-1 and, 181
7-ketocholesterol-induced, glutathione regulation of, 1651
by oxidized low density lipoprotein, p53 and manganese superoxide dismutase in, 461
uterine cell, interleukin-10 and, 189
Architectural proteins: binding of to four-way junction DNA, 421
Arcuate hypothalamic nuclei: glucocorticoid response of, 199
Arginine vasopressin: glucocorticoid response of hypothalamic neuroendocrine neurons and, 199
Aromatic hydroxylation: in diabetes mellitus, 1581
Arterial reconstruction: ideal graft for, 43
Arterial smooth muscle cell differentiation: L-type Ca^{2+} channel expression and, 593
Ascorbic acid: age-related changes in, reversal of with (R)-α-lipoic acid, 1183
Asthma: peroxynitrite in, nitric oxide synthase induction and, 929
Atherosclerosis
age-related changes in lipid metabolism and, 433
Lp(a) adhesion molecule expression by, 1765
metabolic responses to oxidized low density lipoprotein and, 111
Atopic dermatitis: IgE autoantigens in, 1559
ATP-sensitive K^+ channels: phototransfer reactions in regulation of, 523
Authorship: scientific, 1, 3, 149
Autoimmune diseases: molecular mimicry in, 1255
Avoidance behavior: LP-BM5 infection and, 175

Bacterial lipopolysaccharide: induction of endothelial cell synthesis of neutrophil degranulating factor by, 673
Bacteria: multidrug and drug-specific efflux pumps in, 265
Beta-endorphin: glucocorticoid response of hypothalamic neuroendocrine neurons and, 199
Beta-lactams: monoclonal anti-idiotypic antibody hydrolyzing, elicitation of via functional mimicry, 1055
Bet v 1: antibody binding to, peptide mimotope inhibition of, 1635
Biodegradable polymer surfaces: spatially controlled cell engineering on, 1447
Biomedical research
advocacy for, 391
modeling in, principles and philosophy of, 275
Biomedical science
morale in, 225, 259
Ph.D.'s in, education and employment patterns of, 139
whistleblowers in, responsibilities of, 759
Biotherapy: hypoallergens in, 231
Birch pollen allergen: antibody binding to, peptide mimotope inhibition of, 1635
Blood vessel: completely biological tissue-engineered, 47
Bone marrow adipocytes: leptin expression by, 747
Bone resorption: TR1 inhibition of, 845
Brain damage: alcohol-induced, edema-based mechanism of, 221
Brain dopamine neurons: neuroprotection of by S-nitrosoglutathione, 165
Brain: irradiated, prohormone convertase-2 and, 1725
Breast cancer cells
heat shock proteins in, cytoprotection and, 1571
manganese-containing superoxide dismutase inhibition of AP-1 and NF-κB in, 1713
rolling of on P-selectin, CD24 mediation of, 1241
BRE: in tumor necrosis factor-α modulation, 1101
Bromocriptine: neuroprotection against 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine-induced neurotoxicity by, 905

Ca^{2+}
influx of into endothelial cells, myosin light-chain kinase in, 341
oscillations of, STOC activation and, in endothelial cells, 359
Ca^{2+} channels, L-type
inhibition of by estrogenic pollutants, 613
protein kinase C and protein tyrosine kinase regulation of, in retinal degeneration, 1125
vascular smooth muscle cell differentiation and, 593
Calmodulin: membrane-bound, as melatonin binding site, 1401
cAMP: inhibition of TGF-α stimulated CTGF gene expression by, 1151
cAMP response element modulator: novel isoform of, in heart, 1191
Cancer
electromagnetic fields and, 395
Myc in, 633
telomerase in oncogenesis in, 801
Cancer chemotherapy
cisplatin cytotoxicity in, protein recognition of cisplatin-DNA adducts and, 791
doxorubicin cardiotoxicity in, aconitase/iron regulatory protein-1 inactivation and, 541
Cannabinoids: platelet- and macrophage-derived, in endotoxin-induced hypotension, 1035

Cardiac antibodies: in Chagas' disease, Trypanosoma cruzi blocking of, 1551
Cardiac myocytes: ischemia resistance in via adenosine A_1/A_3 expression, 1785
Cardiotoxicity: doxorubicin, aconitase/iron regulatory protein-1 inactivation and, 541
CD8: targeting of to Golgi complexes and vacuoles, in celiac disease enterocytes, 1349
CD10 antigens: as K562 differentiation markers, 531
CD11b: monosodium urate-induced neutrophil activation and, 209
CD-16: monosodium urate-induced neutrophil activation and, 209
CD24: in mediation of rolling of breast cancer cells on P-selectin, 1241
CD38
as active cyclic ADP-ribose transporter, 1507
dependence of on TCR/CD3 complex in T cells, 581
Celiac disease enterocytes: gliadin peptide, CD8, and T cell receptor targeting in, 1349
Cell cycle
CTGF restriction point in, 1151
G0 phase in, restriction point and, 367
Cell membrane transport: synthetic model of, 249
Cell swelling: detection of, in volume regulation, 571
Cell volume, regulation of
heat shock and, 553
swelling detection for, 571
Cementum-derived growth factor: cyclin E/cyclin E-dependent kinase and, 1233
Ceramide: in feedback control of sphingomyelinase, 999
Cerebral edema: in alcohol-induced brain damage, 221
Chagas' disease: cardiac antibodies in, Trypanosoma cruzi blocking of, 1551
Chemokines: activation of natural killer cells by, via heterotrimeric G-proteins, 913
Chemotherapy See Cancer chemotherapy
Chicken granulosa cells: apolipoprotein A-I production by, 897
Choline: prenatal availability of, hippocampal cholinergic system development and. 349
Cigarette smoking: DNA alterations and, 753
Circadian rhythms: MT_2 melatonin receptor antagonists and, 1211
Cisplatin: cytotoxic effects of, protein recognition of cisplatin-DNA adducts in, 791
Cisternal maturation: in intra-Golgi transport, 249
Colitis: kallikrein inhibition for, 325
Colonic enterocytes: nitric oxide synthase and soluble guanylyl cyclase coexpression in, 1643
Congestive heart failure: mechanics, energetics, and crossbridge kinetics of diaphragm in, 981
Coronary artery bypass graft: ideal graft for, 43
Coronary artery disease: VDR genotype as susceptibility marker for, 1409
Coronary vascular muscle cell reactivity: ovarian hormones and, 1419
Corticotropin-releasing factor/receptor: hair cycle-dependent expression of in skin, 287
Cranial radiation: prohormone convertase-2 and, 1725
Creatine kinase: in regulation of ATP-sensitive K^+ channels, 523
Crystal-induced neutrophil activation: CD16 and CD11b in, 209
CTGF gene expression: TGF-β stimulated, cAMP inhibition of, 1151
Cyclic ADP-ribose transporter: CD38 as, 1507
Cyclin-dependent kinase inhibitors: telomerase activity and, 801
Cyclin E/cyclin E-dependent kinase: in mitogenic stimulation by cementum-derived growth factor, 1233
Cyclooxygenase-2: in agonist-activated neutrophils, 1109
Cyclooxygenase: in biology and disease, 1063
Cys-scanning mutagenesis: of membrane transport protein, 1281
Cystathionine: in inhibition of reduced glutathione extrusion, 479
Cytokines: proinflammatory, leptin regulation of, 57

Dementia: AIDS, LP-BM5 infection as animal model of, 175
Dental amalgam mercury vapor: neurobehavioral effects of, 971
Dermatitis: atopic, IgE autoantigens in, 1559
Dexamethasone: hypothalamic neuroendocrine neuron response to, 199
Diabetes mellitus
aromatic hydroxylation in, 1581
growth hormone overexpression in, 1455
Diadenosine polyphosphates: in stimulus-secretion coupling, 1499
Diamide: redox regulation of ubiquitin-conjugating enzymes and, 561
Diaphragm: mechanics, energetics, and crossbridge kinetics of, in congestive heart failure, 981
Dietary fat: mitochondrial respiration and, 243
Diet-induced thermogenesis: training effects on, uncoupling protein and, 335
Diet: maternal, agouti gene expression and, 949
DNA
four-way junction, architectural protein binding to, 421
oxidative damage to, in lymphocytes, 1397
single-stranded, in transcriptional regulation, 515
DNA adducts
alcohol/cigarette induction of, 753
cisplatin, protein recognition of, 791
DNA instability: folic acid depletion and, 1491
DNA mismatch repair protein hMSH2: prediction-based threading of, 653
DNA repair: IRF-1 in, 181
DNA translocation: voltage-dependent anion channel-facilitated, 495
Dopamine neurons: neuroprotection of by S-nitrosoglutathione, 165
Doxorubicin: cardiotoxicity of, aconitase/iron regulatory protein-1 inactivation and, 541
Drug-specific efflux pumps: bacterial, 265

Education: of Ph.D.'s in biomedical science, 139
Efflux pumps: multidrug and drug-specific bacterial, 265
Elderly: lipid metabolism in, atherosclerosis and, 433
Electromagnetic fields: biological responses to, 395
Employment opportunities: for Ph.D.'s in biomedical science, 139
Endometrium: platelet-activating factor receptor in, during menstrual cycle, 831
Endoplasmic reticulum degradation of yeast plasma membrane protein: ubiquitin-proteasome pathway in, 315
Endothelial cell migration
heat shock protein 27 in, 1481
kringle domains of angiostatin as antagonists of, 1731
Endothelial cells
Ca^{2+} influx into, myosin light-chain kinase regulation of, 341
Ca^{2+} oscillations and STOC activation in, 359
in regulation of polymorphonuclear leukocyte degranulation, 733
Endotoxic shock: platelet- and macrophage-derived cannabinoids in, 1035
Endurance training: mRNA expression of uncoupling proteins and, 335
Enterocolitis: kallikrein inhibition for, 325
Epigenetics: maternal, agouti gene expression and, 949
Epithelial growth factor receptor: activation of by oxidized low density lipoprotein, 665
ER degradation of yeast plasma membrane protein: ubiquitin-proteasome pathway in, 315
Erythroleukemic cell line K562: differentiation of, Kell blood group antigens and CD10 antigens in, 531
17β-Estradiol: rapid insulinotropic effect of, via plasma membrane receptor, 1341
Estrogen: coronary vascular muscle cell reactivity and, 1419
Estrogenic pollutants: inhibition of L-type Ca^{2+} channels by, 613
ESX: in mammary gland development and involution, 1541
Ethanol
brain damage from, edema-based mechanism of, 221
DNA alterations and, 753
Ets transcription factor ESX: in mammary gland development and involution, 1541
Exercise
effects of on muscle signaling pathways, 1379
protein overexpression and, improved glucose homeostasis and, 1701
Exercise endurance training: mRNA expression of uncoupling protein and, 335
Experimental Biology '98: abstracts from, 375

F_2-isoprostanes: in Alzheimer's disease, 1777
Factor VIIIa: as nerve-associated transglutaminase, 1163
Fat: dietary, mitochondrial respiration and, 243
FCγRIIIB: monosodium urate-induced neutrophil activation and, 209
Fetal growth restriction and demise: interleukin-10 and, 189
FGF-inducible response element: in wound reepithelialization, 959
Fibroblast growth factor-2: stimulation of HGF-dependent cell migration by, 1027
Fibroblast proliferation: TR1 induction of, 845
Fibroblasts
cementum-derived growth factor in, cyclin E/cyclin E-dependent kinase and, 1233
proteolytic imbalance in, in Alzheimer's disease, 925
FiRE: in wound reepithelialization, 959
Folic acid depletion: DNA instability and, 1491
Follicle-stimulating hormone: in testis, 1045
Four-way junction DAN: architectural protein binding to, 421
Functional mimicry: antibody catalysis via, 1055
Furosemide: as neuroprotectant, for alcohol-induced brain damage, 221

G1 phase: of cell cycle, restriction point division of, 367
Gene regulation: translational control of, 299
$G_{\beta\gamma}$ subunits: inhibition of adenylyl cyclase isoforms by, 1019
Giardia intestinalis: swelling detection in cell volume regulation in, 571

Gliadin peptides: targeting of to Golgi complexes and vacuoles, in celiac disease enterocytes, 1349
Glucocorticoid response potential: of hypothalamic neuroendocrine neurons, 199
Glucocorticoids: for asthma, nitric oxide synthase induction by peroxynitrite and, 929
Glucosamine-6-phosphate deaminase: cloned mammalian, localization of to transporting epithelium and lack of oscillin activity in, 91
Glucose homeostasis: exercise-induced protein overexpression and, 1701
Glucose: in regulation of immediate early-response genes, in pancreatic β cells, 1173
Glucose uptake: adenosine receptor blockade and, 1301
GLUT1 glucose transport system: down-regulation of by sustained hyperglycemia, 1221
Glutathione
in control of 7-ketocholesterol-induced apoptosis, 1651
in redox regulation of ubiquitin-conjugating enzymes, 561
reduced, inhibited extrusion of, cell rescue from apoptosis by, 479
Glutathione peroxidase: viral myocarditis and, 1143
Gout: crystal-induced neutrophil activation in, 209
G-protein coupling: human thyrotropin receptor and, 1461
G-proteins
in chemokine activation of natural killer cells, 913
heterotrimeric, in chemokine activation of natural killer cells, 913
Graft
ideal small arterial, 43
vascular, completely biological tissue-engineered, 47
Granulosa cells: apolipoprotein A-I production by, 897
Growth hormone: overexpression of, in acromegaly and diabetes, 1455
Guanylyl cyclase: nitric oxide synthase and, in colonic enterocytes, 1643
Gupta, Naba, 390 (obituary)

Hair growth: corticotropin-releasing factor/receptor expression in skin and, 287
Heart: cAMP response element modulator isoform in, 1191
Heart failure: mechanic, energetics, and crossbridge kinetics of diaphragm in, 981
Heat shock: influence of on cell volume regulation, 553
Heat shock protein 27: in endothelial cell migration, 1481
Heat shock protein 70: overexpression of, inhibition of HSF1 phosphorylation and, 451
Heat shock proteins: cytoprotection and, in breast cancer, 1571
Heme oxygenase 1 gene: pyrrolidine dithiocarbamate transcriptional regulation of, 1675
Hemin: in K562 differentiation, Kell blood group and CD10 antigens and, 531
Hepatic transplant: T cell proliferation in allograft in, 939
Hepatocyte growth factor-dependent cell migration: FGF-2 stimulation of, 1027
Hepatocytes: IRF-1 in, altered DNA repair and p53 dysregulation and, 181
Hexosamine: glucosamine-6-phosphate deaminase regulation of, 91
High endothelial venules: sulfation in, human PAPS synthetase in, 603
Hippocampal cholinergic system: prenatal development of, choline availability and, 349
Histidine decarboxylase transcription: hrRANTES and, 1693
HIV. See Human immunodeficiency virus
HL-60 cells: retinoic acid disposition in, 1627
HMG1 box proteins: binding of to four-way junction DNA, 421
HMG1-Y proteins: binding of to four-way junction DNA, 421
Holliday DNA: architectural protein binding to, 421
hrRANTES: mast cell recruitment and histidine decarboxylase transcription and, 1693
HSF1 phosphorylation: inhibition of by heat shock protein 70 overexpression, 451
HU: binding of to four-way junction DNA, 421
Human immunodeficiency virus: presence and cellular distribution of in testes, 151
Human immunodeficiency virus infection
deficit of antibodies for superantigen binding site of gp120 in, 1473
enhanced platelet activation with abnormal release of RANTES in, 79
progression of, host gene influence on, 625
restoration of T cell immune responses by protein kinase A type I antagonist in, 855
sources of quinolinic acid in, 881
vaccine for, synthetic peptides for, 991
Human IP-10: in promotion of interferon-γ dominance over interleukin-4, 705
Human PAPS synthetase: in sulfation in high endothelial venules, 603
Human thyrotropin receptor: signal transduction by, 1461
11β-Hydroxysteroid dehydrogenase: in adrenal cortex, 1533
Hyperglycemia: in down-regulation of GLUT1 glucose transport system, 1221
Hypoallergens: in immunotherapy, 231
Hypotension: endotoxin-induced, platelet- and macrophage-derived cannabinoids and, 1035
Hypothalamic neuroendocrine neurons: glucocorticoid response potential of, 199

IgE autoantigens: in atopic dermatitis, 1559
IgE reactivity: of allergens, mutagenic modulation of, 231
IHF: binding of to four-way junction DNA, 421
I-κBα: prostaglandin A_1-induced stress response and, 1371
Immediate early-response genes: glucose regulation of, in pancreatic β cells, 1173
Immune-mediated diseases: molecular mimicry in, 1255
Immune modulation: for genetic immunization, 1611
Immune responses: proinflammatory, leptin regulation of, 57
Immunization: genetic, modulation of immune response to, 1611
Immunotherapy: hypoallergens in, 231
Implantation: endometrial remodeling in, platelet-activating factor in, 831
Increased intracranial pressure: in alcohol-induced brain damage, 221
Inducible nitric oxide synthase: in macrophages, melatonin inhibition of, 685
Inflammatory bowel disease: plasma kallikrein inhibition in, 325
Inflammatory immune responses: leptin regulation of, 57
Insulin receptor β-chain: redox priming of, 863
Insulin resistance: tissue-specific, adenosine receptor blockade and, 1301
Insulin secretion: 17β-estradiol and, 1341
Integration host factor: binding of to four-way junction DNA, 421
Interferon-γ: dominance of over interleukin-4, human IP-10 promotion of, 705
Interleukin-1α-converting enzyme: telomerase activity and, 801
Interleukin-4: interferon-γ dominance over, human IP-10 promotion of, 705
Interleukin-6: lipid metabolism in elderly and, 433
Interleukin-10: fetal growth restriction and demise and, 189
Interphotoreceptor retinoid binding protein: vitamin A regulation of, 120
Intracellular diadenosine polyphosphates: in stimulus-secretion coupling, 1499
Intra-Golgi traffic: synthetic model of, 249
Intrauterine growth retardation: interleukin-10 and, 189
Ion channels. See also Ca^+ channels; K^+ channels
voltage dependent, in DNA translocation, 495
IRF-1: altered DNA repair and p53 dysregulation in hepatocytes and, 181
Iron regulatory protein-1: doxorubicinol inactivation of, 541

K562 differentiation: Kell blood group antigens and CD10 antigens as markers of, 531
Kallikrein inhibition: for inflammatory bowel disease, 325
K^+ channels: ATP-sensitive, phosphotransfer reactions in regulation of, 523
Kell blood group antigens: as K562 differentiation markers, 531
Keratinocytes: migrating, growth factor-responsive enhancer and, 959
7-Ketocholesterol-induced apoptosis: glutathione regulation of, 1651
Kringle domains: of angiostatin, antiangiogenesis activity of, 1731

β-Lactams: monoclonal anti-idiotypic antibody hydrolyzing, elicitation of via functional mimicry, 1055
Leptin
high expression of by bone marrow adipocytes, 747
in regulation of proinflammatory immune responses, 57
Leukemia KG1a cells: resistance of to tumor necrosis factor-α, sphingomyelin and, 101
Leukotriene B_4 synthesis: lipopolysaccharide priming of, 1521
Linker histones: binding of to four-way junction DNA, 421
Lipid metabolism: age-related changes in, atherosclerosis and, 433
Lipid: muscle utilization of, muscle uncoupling protein 2 and, 1739
Lipid peroxidation: enhanced, in Alzheimer's disease, 1777
(R)-α-Lipoic acid: in reversal of age-related ascorbic acid changes, 1183
Lipolysis: inhibition of in adipocytes, by agouti gene, 1391
Lipopolysaccharide: induction of endothelial cell synthesis of neutrophil degranulating factor by, 673
Lipopolysaccharides: priming effect of in leukotriene B_4 synthesis, 1521
Lipoprotein: oxidized low density, effect of on metabolic responses in macrophages, 111
Lipoxin B_4: design of stable analogues of, 487
5-Lipoxygenase: age-associated up-regulation of, 439
Liver transplant: T cell proliferation in allograft in, 939
Low density lipoprotein, oxidized
effect of on metabolic responses in macrophages, 111
epithelial growth factor receptor activation by, 665
p53 and manganese superoxide dismutase-dependent apoptosis and, 461
in vascular endothelial cell pinocytosis, 823
Low density lipoprotein receptor: in inhibition of rhinovirus infection, 695

Lp(a): atherogenicity of, adhesion molecule expression and, 1765
LP-BM5 infection: active avoidance behavior and, 175
L-type Ca^+ channels. See Ca^+ channels, L-type
Lymphocytes. See also under T cell(s)
increased apoptosis in, in spaceflight, 1007
oxidative DNA damage in, 1397
Lysophosphatidic acid: cellular receptor and functional diversity in, 1589
Lysophospholipid growth factors: cellular receptor and functional diversity in, 1589

Macrophages: metabolic responses in, oxidized low density lipoprotein effects on, 111
Mammary gland: Ets transcription factor ESX activity in, 1541
Manganese superoxide dismutase
inhibition of AP-1 and NF-κB in breast cancer cells by, 1713
in oxidized low density lipoprotein-induced apoptosis, 461
MAP kinase pathway: prosaposin activation of, 307
Markers: peripheral cell, in Alzheimer's disease diagnosis, 3
Mast cell recruitment: hrRANTES and, 1693
Matrix metalloproteinases: structures, evolution, and diversification of, 1075
Medical school: discipline-based departments in, 621
Melatonin
in inhibition of inducible nitric oxide synthase in macrophages, 685
in limitation of synaptically induced neurodegeneration, 727
membrane-bound calmodulin as binding site for, 1401
Melatonin receptor antagonists: in melatonin-mediated phase advances of circadian rhythms, 1211
Membrane potential modulators, 1793
Membrane transport: synthetic model of, 249
Membrane transport protein: cys-scanning mutagenesis of, 1281
Memory: prenatal choline availability and, 349
Mercury vapor: dental amalgam, neurobehavioral effects of, 971
Methionine: in inhibition of reduced glutathione extrusion, 479
1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine-induced neurotoxicity: bromocriptine neuroprotection against, 905
Methyl supplements: agouti gene expression and, 949
Microtubules: alteration of, in spaceflight, 1007
Mimicry
functional, antibody catalysis via, 1055
molecular, in immune-mediated diseases, 1255
Mitochondrial porin: in DNA translocation, 495
Mitochondrial respiration: dietary fat and, 243
Mitogen-activated kinase pathway: prosaposin activation of, 307
Modeling: principles and philosophy of, 275
Molecular mimicry: in immune-mediated diseases, 1255
Monoclonal anti-idiotypic antibody hydrolyzing β-lactams: elicitation of via functional mimicry, 1055
Monosodium urate-induced neutrophil activation: CD16 and CD11b in, 209
MT_2 melatonin receptor antagonists: in melatonin-mediated phase advances of circadian rhythms, 1211
Multidrug and drug-specific efflux pumps: bacterial, 265
Muscle
signaling pathways in, exercise effects on, 1379
vertebrate skeletal, thin filament regulation in, 761
Muscle uncoupling protein 2: reduced muscle lipid utilization and, 1739
Mutagenesis: Cys-scanning, of membrane transport protein, 1281
Myc: in cell growth and transformation, 633
Myocarditis: viral, glutathione peroxidase and, 1143
Myocytes
cardiac, ischemia resistance in via adenosine A_1/A_3 expression, 1785
protein loss and reactive oxygen-mediated NF-κB activation in, tumor necrosis factor and, 871
Myosin II: Ca^{2+}-independent regulation of, protein kinase C in, 813
Myosin light-chain kinase: in regulation of Ca^{2+} influx in endothelial cells, 341

National Institutes of Health: funding for, 1431
Natural killer cells: chemokine activation of, via heterotrimeric G-proteins, 913
Nerve-associated transglutaminase: Factor VIIIa as, 1163
Neurodegeneration
age-associated, 5-lipoxygenase up-regulation and, 439
synaptically induced, melatonin neuroprotection for, 727
Neuroendocrine neurons: hypothalamic, glucocorticoid response potential of, 199
Neurons
dopamine, neuroprotection of by S-nitrosoglutathione, 165
hypothalamic neuroendocrine, glucocorticoid response potential of, 199
Neuroprotection
of brain dopamine neurons, by S-nitrosoglutathione, 165
melatonin in, 727
Neutral sphingomyelinase: positive feedback control of, ceramide in, 999
Neutrophil activation: crystal-induced, CD16 and CD11b in, 209
Neutrophil degranulating factor: bacterial lipopolysaccharide-induced synthesis of, 673
Neutrophils: cylooxygenase-2 in, 1109
NF-κβ
manganese-containing superoxide dismutase inhibition of, in breast cancer cells, 1713
reactive oxygen-mediated activation of in myocytes, tumor necrosis factor α and, 871
Nitric oxide derivatives: in neuroprotection of brain dopamine neurons, 165
Nitric oxide: in uterine apoptosis, 189
Nitric oxide synthase
constitutive isoforms of, expressional control of, 773
inducible isoform of, melatonin inhibition of in macrophages, 685
and soluble guanylyl cyclase, in colonic enterocytes, 1643
S-Nitrosoglutathione: in neuroprotection of brain dopamine neurons, 165

Obesity
complications of, leptin regulation of proinflammatory immune responses and, 57
muscle uncoupling protein 2 overexpression in, 1739
thermogenesis in. See Thermogenesis
tissue-specific insulin resistance in, adenosine receptor blockade and, 1301
Obituary: Naba Gupta, 390
Oncogenesis
Myc in, 633
telomerase in, 801
Oscillin: lack of, in cloned mammalian glucosamine-6-phosphate deaminase, 91
Osteoclastogenesis: TR1 inhibition of, 845
Ovarian hormones: coronary vascular muscle cell reactivity and, 1419
Oxidative phosphorylation: dietary fat and, 243
Oxidative stress
in Alzheimer's disease, 1777
on brain dopamine neurons, S-nitrosoglutathione neuroprotection for, 165
Oxidized low density lipoprotein: effect of on metabolic responses in macrophages, 111

p53
dysregulation of, in IRF-1 null hepatocytes, 181
in oxidized low density lipoprotein-induced apoptosis, 461
Pancreatic β cells
17β-estradiol insulinotropic effect in, 1341
glucose regulation of immediate early-response genes in, 1173
Paraventricular hypothalamic nuclei: glucocorticoid response of, 199
Peptide mimotopes: in inhibition of antibody binding to birch pollen allergen, 1635
Peripheral markers: in Alzheimer's disease diagnosis, 3
P-glycoprotein blocker PSC833: tumor necrosis factor-α apoptosis and, 101
Ph.D.'s: in biomedical sciences, education and employment patterns of, 139
PHGPx: testosterone mediation of, 1359
Phorbol ester: in K562 differentiation, Kell blood group and CD10 antigens and, 531
Phospholipase D2: and PLD isoform splice variants, 1309
Phosphotransfer reactions: in regulation of ATP-sensitive K^+ channels, 523
Photoreceptors: vitamin A-regulated, retinoid binding protein in, 120
Pinocytosis: vascular endothelial cell, oxidized low density lipoprotein in, 823
Placenta
GLUT1 glucose transport system in, hyperglycemic down-regulation of, 1221
intereukin-10 effects on, 189
Plasma kallikrein inhibition: in inflammatory bowel disease, 325
Platelet-activating factor receptor: in endometrium during menstrual cycle, 831
Platelet activation: enhanced, with abnormal release of RANTES, in HIV infection, 79
Platelet-derived growth factor receptor α: stress activation of, in vascular smooth muscle, 1135
Polymorphonuclear leukocyte degranulation: endothelial cell regulation of, 733
Porin: mitochondrial, in DNA translocation, 495
Potassium channels: ATP-sensitive, phosphotransfer reactions in regulation of, 523

Pregnancy: diet and methyl supplements in, agouti gene expression and, 949
Progesterone: coronary vascular muscle cell reactivity and, 1419
Prohormone convertase-2: in irradiated rat brain, 1725
Proinflammatory immune responses: leptin regulation of, 57
Prosaptide: activation of MAP kinase pathway by, 307
Prostaglandin endoperoxide synthase-2: in agonist-activated neutrophils, 1109
Protein binding: to four-way junction DNA, 421
Protein kinase A type I antagonist: restoration of T cell immune responses by, 855
Protein kinase C
in Ca^{2+}-independent regulation of myosin II, 813
inhibition of by heat shock protein 70 overexpression, HSF1 dephosphorylation and, 451
regulation of L-type Ca^{2+} channels by, in retinal degeneration, 1125
Protein kinase C isozymes: anchoring proteins for, 35
Protein overexpression: improved glucose homeostasis and, 1701
Protein phosphatase: activation of by heat shock protein 70 overexpression, HSF1 dephosphorylation and, 451
Protein synthesis: RNA-directed L-amino acid homochirality and, 503
Protein tyrosine kinases: regulation of L-type Ca^{2+} channels by, in retinal degeneration, 1125
PSC833: tumor necrosis factor-α apoptosis and, 101
P-selectin: rolling of breast cancer cells on, CD24 mediation of, 1241
Pyrrolidine dithiocarbamate transcriptional regulation: of heme oxygenase 1 gene, 1675
Pyruvate kinase: in regulation of ATP-sensitive K^+ channels, 523

Quinolinic acid: sources of in HIV infection, 881

RACKS (receptors for activated C-kinase): as anchoring proteins for protein C isozymes, 35
RANTES
abnormal release of, in HIV infection, 79
mast cell recruitment and histidine decarboxylase transcription and, 1693
Redox regulation: of ubiquitin-conjugating enzymes, 561
Reduced glutathione: inhibited extrusion of, cell rescue from apoptosis by, 479
Rejection: in liver transplant, T cell proliferation in allograft in, 939
Research
biomedical, advocacy for, 391
modeling in, principles and philosophy of, 275
Research papers: authorship of, 1, 3, 149
Retinal degeneration: L-type Ca^{2+} channel regulation by protein kinase C and protein tyrosine kinase in, 1125
Retinoic acid: in HL-60 cells, 1627
Retinoic acid receptors: transcription factor GHF-1 and, 1201
Retinoid binding protein: vitamin A-regulated Interphotoreceptor, 120
Retroviral infections: sources of quinolinic acid in, 881
Rhinovirus infection: inhibition of by low density lipoprotein receptor, 695
RICKS (receptors for inactivated C-kinase): as anchoring proteins for protein C isozymes, 35
RNA: in L-amino acid homochirality, 503
RNA polymerase II: transcriptional elongation activity in, 1437

Scatter factor-receptor interactions: therapeutic applications of, 1267
Schwann cells: enhanced sulfatide synthesis by, prosaptide and, 307
Scientific authorship, 1, 3, 149
Selenium deficiency: plasma membrane ubiquinone reductase in, 1665
Selenoprotein PHGPx: testosterone mediation of, 1359
Serine protease inhibitor
in astrocytes, transforming growth factor β1 neuroprotective activity and, 1683
in neuroprotective activity of TRG β1, 1683
Shock: endotoxic, platelet- and macrophage-derived cannabinoids in, 1035
Sialic acid: glucosamine-6-phosphate deaminase regulation and, 91
Signal transduction: novel protein complex with similarities to 26S proteosome in, 469
Single-stranded DNA regions: in transcriptional regulation, 515
Skin: corticotropin-releasing factor/receptor, hair cycle-dependent expression of, 287
Skin equivalent: human capillary-like network in, 1331
Small arterial substitute, 43
Smoking: DNA alterations and, 753
Soluble guanylyl cyclase: nitric oxide synthase and, in colonic enterocytes, 1643
Spaceflight: microtubule alteration and increased lymphocyte apoptosis in, 1007
Spatially controlled cell engineering, 1447
Sphingomyelinase: positive feedback control of, ceramide in, 999
Sphingomyelin: tumor necrosis factor-α apoptosis resistance and, 101
Sphingosine 1-phosphate: cellular receptor and functional diversity in, 1589
S-thiolation: in redox regulation of ubiquitin-conjugating enzymes, 561
STOC activation: Ca^{2+} oscillations and, in endothelial cells, 359
Stress: platelet-derived growth factor receptor α activation by, in vascular smooth muscle, 1135
Stress response: prostglandin A_1 indcution of, I-κBα espression and, 1371
Sulfatide synthesis: enhanced Schwann cell, prosaptide and, 307
Sulfation: in high endothelial venules, human PAPS synthetase in, 603
Swelling detection: in cell volume regulation, 571
SWI/SNF complex: binding of to four-way junction DNA, 421
Synthetic models: principles and philosophy for, 275
Synthetic peptides: for HIV vaccine, 991

T cell(s)
activation of, translational control of gene regulation in, 299
$CD4^+$ Fas mRNA and receptor on, T helper type cytokine down-regulation of, 1747
CD38 dependence on TCR/CD3 complex in, 581
intrahepatic proliferation of in allograft rejection, 939
T cell immune responses: restoration of in HIV infection, by protein kinase A type I antagonist, 855
T cell receptors: targeting of to Golgi complexes and vacuoles, in celiac disease enterocytes, 1349
TCR/CD3 complex: in T cells, CD38 dependence on, 581
Telomerase: antisense, apoptosis or differentiation by, 801
Testis
follicle-stimulating hormone in, 1045
HIV presence and cellular distribution in, 151
Testosterone: selenoprotein PHGPx expression and, 1359
T helper type 2 cytokines: in down-regulation of Fas mRNA and receptor on $CD4^+$ T cells, 1747
Thermogenesis
diet-induced, training effects on, uncoupling protein and, 335
UCP homologues in, 715
Thin filament regulation: in vertebrate skeletal muscle, 761
Thymocyte differentiation: enhancement of by vasoactive intestinal peptide, 119
Thyroid hormone
transcription factor GHF-1 and, 1201
transcription of, T_3 receptor specific regulation of, 1755
Thyrotropin receptor: signal transduction by, 1461
Tissue-engineered blood vessel: completely biological, 47
Toxic shock: platelet- and macrophage-derived cannabinoids in, 1035
TR1: bioactivities of, 845
Training effect: mRNA expression of uncoupling protein and, 335
Transcriptional activation: Myc in, 633
Transcriptional regulation
of constitutive isoforms of nitric acid synthase, 773
single-stranded DNA regions and Y-box proteins in, 515
Transcription factor GHF-1: thyroid hormone and retinoic acid receptors and, 1201
Transforming growth factor β1: neuroprotective activity of, up-regulation of serine protease inhibitor in astrocytes and, 1683
Transglutaminase: nerve-associated, Factor VIIIa as, 1163
Translational control: of gene regulation during T cell activation, 299
Translocation: DNA, voltage-dependent anion channel-facilitated, 495
Transplant: liver, T cell proliferation in allograft in, 939
Transportan: cell penetration by, 67
Transport: membrane, synthetic model of, 249
Triiodothyronine: transcription of, T_3 receptor specific regulation of, 1755
Tropomyosin: in thin filament regulation in vertebrate skeletal muscle, 761
Troponin: in thin filament regulation in vertebrate skeletal muscle, 761
Trypanosoma cruzi: blocking of cardiac antibodies in Chagas' disease by, 1551
Tumor necrosis factor-α
BRE modulation of, 1101
ceramide generation and apoptosis by, P-glycoprotein blocker PSC833 and, 101
protein loss and reactive oxygen-mediated NF-κB activation in myocytes and, 871
in uterine apoptosis, 189
Tumor necrosis factor: leptin regulation of, 57
Tumor necrosis factor receptor TR1: bioactivities of, 845
Tumors: electromagnetic fields and, 395

Ubiquinone reductase: plasma membrane, in vitamin E and selenium deficiency, 1665
Ubiquitin-conjugating enzymes: redox regulation of, 561
Ubiquitin-proteasome pathway: in ER degradation of yeast plasma membrane protein, 315

UCP homologues: as thermogenesis mediators vs. fuel lipid regulators, 715
Ulcerative colitis: kallikrein inhibition for, 325
Uncoupling protein 2: reduced muscle lipid utilization and, 1739
Uncoupling proteins: mRNA expression of, endurance training effects on, 335
Uracil permease: ER degradation of, ubiquitin-proteasome pathway in, 315
Urokinase receptor: HGF-dependent relocalization of, FGF-2 stimulation of, 1027
Uterine cell apoptosis: interleukin-10 and, 189

Vascular endothelial cell pinocytosis: oxidized low density lipoprotein in, 823
Vascular graft
completely biological tissue-engineered, 47
vascular, ideal small arterial, 43
Vascular hyperreactivity: coronary artery, ovarian hormones and, 1419
Vascular relaxation: inhibition of L-type Ca^{2+} channels by estrogenic pollutants and, 613
Vascular risk factors: age-related modifications in, 433
Vascular smooth muscle cell differentiation: L-type Ca^{2+} channel expression and, 593
Vascular smooth muscle: stress-activated platelet-derived growth factor receptor α in, 1135
Vasoactive intestinal peptide: enhancement of thymocyte differentiation by, 119
VDR genotype: as coronary artery disease susceptibility marker, 1409
Visual sensitivity: vitamin A-regulated Interphotoreceptor retinoid binding protein and, 120
Vitamin A: interphotoreceptor retinoid binding protein regulation by, 120
Vitamin E deficiency: plasma membrane ubiquinone reductase in, 1665
Voltage-dependent anion channels: in DNA translocation, 495

Whistleblowers: responsibilities of, 759
Winged helix proteins: binding of to four-way junction DNA, 421
Wound healing: growth factor-responsive enhancer in migrating keratinocytes in, 959

Y-box proteins: in transcriptional regulation, 515
y$^+$L/4F2hc: as heteromultimeric complex, 1319
